HEARING LOSS CHECKLIST
Do you have a hearing loss?

The following questions will help you determine if you need to have your hearing evaluated by a medical professional:

- Do you have trouble hearing over the telephone?
- Do you have a problem following conversations in small or large groups?
- Do others complain that you turn the TV volume up too loud?
- Do you have trouble hearing in noisy situations like a restaurant?
- Do many people sound like they mumble when they speak to you?
- Do you misunderstand what others are saying and respond inappropriately?
- Do you find it difficult to understand a speaker at a public meeting or a religious service?
- Do you find yourself asking people to speak up or repeat themselves?
- Does a hearing problem cause you to feel embarrassed, especially when meeting new people?
- Do you experience ringing or noises in your ears?

If you answered “yes” to three or more of these questions, you may want to see an audiologist for a hearing evaluation.

The material on this page is for general information only and is not intended for diagnostic or treatment purposes. A doctor or other health care professional must be consulted for diagnostic information and advice regarding treatment.
